THE QUEEN'S SHAME!

For years, black bears in Canada have been shot and slaughtered or have suffered for days in traps, slowly bleeding to death. Why? For their skins. The Queen's Guards' ceremonial headgear is ***still*** made from real bearskins despite all the humane alternatives available. Bears are intelligent animals who live in family groups and feel pain and terror when shot or caught in a trap. Please sign this petition and let Her Majesty Queen Elizabeth II and the Ministry of Defence know that you are opposed to the violent and bloody slaughter of bears.
