

# SIGN HERE TO HELP SAVE OUR PLANET!

Each year, billions of animals are raised on factory farms and killed in slaughterhouses. These places pollute the air, ground, and water, and—according to the U.N.—raising animals for food causes more greenhouse-gas emissions than all the cars, planes, ships, trains, and SUVs in the world *combined*. People need to know the truth about what they're eating and how it affects the environment, **so sign this petition. It asks the government to put a warning label on meat packages to tell people what meat really is—the number one cause of climate change.**

**PLEASE PRINT CLEARLY**
