

# MISSING

## HAVE YOU SEEN THIS PIG?

**EVERY YEAR, MORE THAN 10 MILLION PIGS, FROGS, CATS, AND OTHER ANIMALS ARE USED FOR CLASSROOM DISSECTION.**

Baby pigs who end up on dissection trays often come from slaughterhouses, where they're cut out of their slaughtered mothers' wombs.

**THIS DOESN'T HAVE TO HAPPEN. CHOOSE NOT TO DISSECT ANIMALS.**

There are lots of modern, humane alternatives—such as computer simulators and dissectible models—that spare animals, are more effective at teaching students, and save schools time and money.
